

namuri a lasting impression™

Exclusively from:

namu 나무
namuri
우리 uri

In honour of the material's Korean origin, Namuri is an amalgamation of two words from the Korean language:

나무

Namu - meaning tree, the inspiration for the product finishes and a living testament to growth and resilience.

우리

Uri, a cherished Korean term, the essence of togetherness and community, embodying the harmonious blend of 'you and I' into 'us,' a shared identity and collective spirit.

Behind the tagline: “a lasting impression”

In the English language, to leave “a lasting impression” is to etch a vivid mark on someone's memory - a resonating echo that continues to speak long after the moment has passed.

To “impress” is also to represent an image on a surface, as Namuri does with deep, wood-like textures on surface foil products.

In this sense, “a lasting impression” carries a double meaning.

Our products deliver beautiful quality that is designed to last, physically and in memory.

The epitome of elegance and sophistication in surface foil design.

With a range of 10 high-quality finishes, Namuri redefines luxury for worktops and doors, infusing them with unparalleled grace and timeless aesthetics.

From minimalist matte to deep, authentic woodgrain effects, each finish is crafted to perfection, ensuring that it resonates with diverse interior design aspirations.

Whether you're revamping a space or creating a new one, Namuri's curated collection brings a touch of opulence to every project.
